

I CLAIM:

1 1. A finger thinking educational tool comprising a finger-
2 tip encirclement worn on a finger of a user's hand when writing
3 or studying, having a surface positioned thereon to be rubbed
4 between at least two fingers of the hand in recalling
5 educational material previously learned.

1 2. The finger thinking educational tool of Claim 1 wherein
2 said finger-tip encirclement is worn on one of the index,
3 middle, ring and little fingers of the hand.

1 3. The finger thinking educational tool of Claim 1 wherein
2 said finger-tip encirclement is worn on the thumb of the hand.

1 4. The finger thinking educational tool of Claim 1 wherein
2 said finger-tip encirclement is composed of a durable soft
3 fabric.

1 5. The finger thinking educational tool of Claim 1 wherein
2 said finger-tip encirclement is composed of a durable soft
3 flexible fabric placeable on a finger of the hand by a pinching
4 of opposite sides thereof.

1 6. The finger thinking educational tool of Claim 5 wherein
2 said finger-tip encirclement is composed of a leather-like
3 fabric.

1 7. The finger thinking educational tool of Claim 6 wherein
2 said finger-tip encirclement is composed of one of a natural and
3 brown colored leather.

1 8. The finger thinking educational tool of Claim 1 wherein
2 said surface includes a discernible point of attention focus
3 thereon.

1 9. The finger thinking educational tool of Claim 1 wherein
2 said surface includes a discernible point of attention focus
3 smooth to a tapping or rotational touch.

1 10. The finger thinking educational tool of Claim 8 wherein
2 said discernible point of attention focus includes a magnetic
3 insert.

1 11. The finger thinking educational tool of Claim 8 wherein
2 said discernible point of attention focus includes a magnetic
3 insert of small screen appearance.

1 12. The finger thinking educational tool of Claim 10
2 wherein said discernible point of attention focus includes a

3 magnetic insert of minimal strength.

1 13. The finger thinking educational tool of Claim 10
2 wherein said discernible point of attention focus includes a
3 magnetic insert of minimal strength facing inwardly towards the
4 palm of the user's hand.

1 14. A finger thinking educational tool comprising a finger-
2 tip encirclement worn on one of the index, middle, ring and
3 little fingers of a user's hand when writing or studying, having
4 a magnetic surface positioned thereon to be rubbed between the
5 thumb and said one finger of the hand in recalling educational
6 material previously learned.

1 15. The finger thinking educational tool of Claim 14
2 wherein said finger-tip encirclement is composed of a soft
3 flexible fiber on which said magnetic surface is permanently
4 affixed adjacent the finger-tip thereof, inwardly facing the
5 palm of the user's hand.

1 16. The finger thinking educational tool of Claim 14
2 wherein said magnetic surface is of a black screen appearance.

1 17. The finger thinking educational tool of Claim 16
2 wherein said finger-tip encirclement is composed of a leather-
3 like fabric of brown or natural color.

1 18. A finger thinking educational tool comprising a finger-
2 tip encirclement worn on one of the fingers of a school-age
3 child's hand when writing or studying, having a magnetic surface
4 positioned thereon to be rubbed with the thumb of the hand in
5 recalling educational material previously learned.

1 19. The finger thinking educational tool of Claim 18
2 wherein said finger-tip encirclement is worn on one of the
3 index, middle, ring and little fingers of a school-age child's
4 non-dominant hand.

1 20. A finger thinking educational tool of Claim 18 wherein
2 said finger-tip encirclement is worn on the thumb of a school-
3 age child's non-dominant hand.
